

How to Make a Decagon

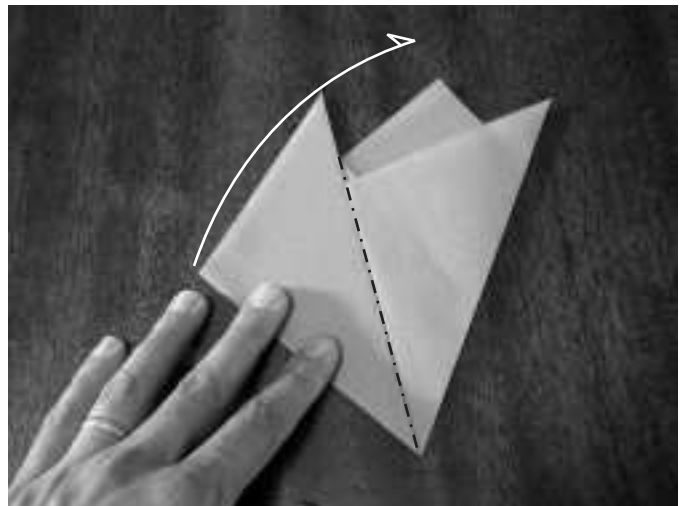

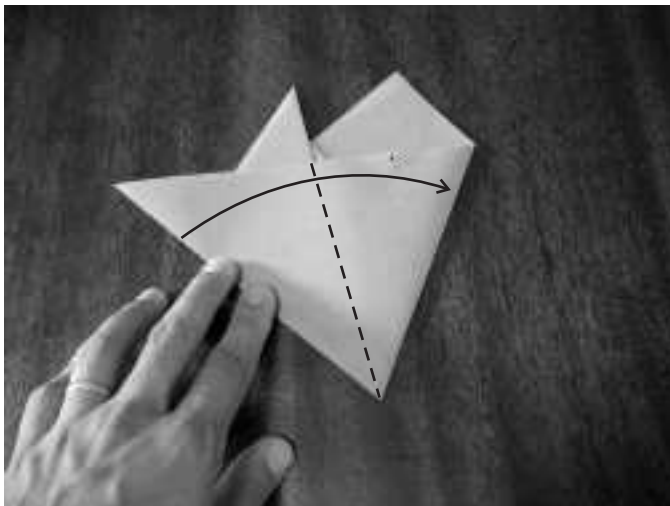

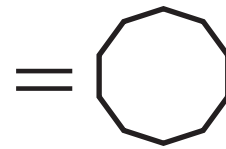

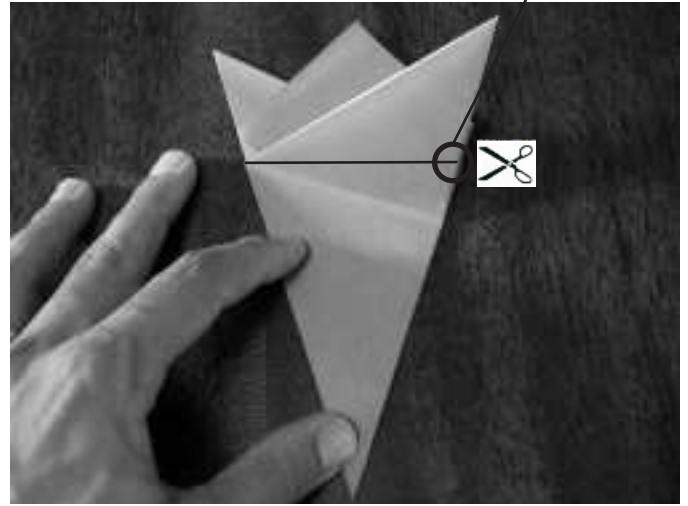

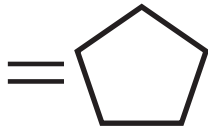

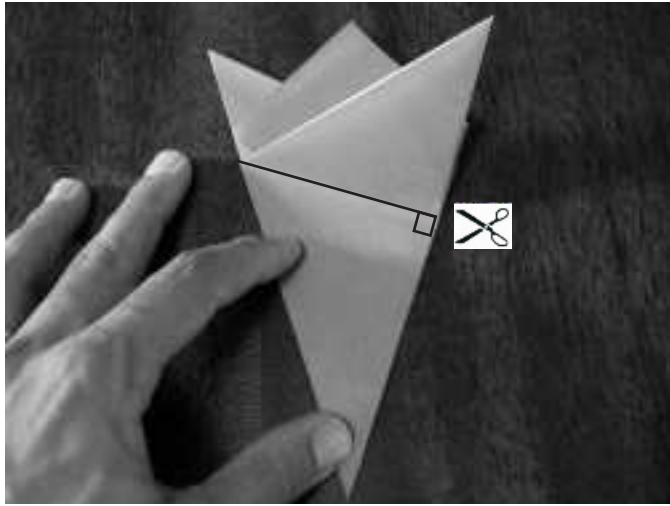

1	2
3	4

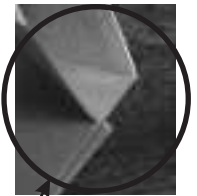

5	6
7	8

9	10
11	12

As far as I know, this method of making a regular decagon or pentagon does not belong to anyone. Nor should it. Please copy, teach, adapt, whatever you like with this idea -- except make money. Making money off of this idea will bring you bad luck. And when you're using a rotary cutter, you don't want bad luck, do you?
